

SILENCER for running self wound lamination

Unique press attachment for running self wound lamination with years of proven experience in the field

Spring loaded tension arm + unique roller design:

- reduce roll pulsation
- reduce apparent unwind noise
- prevent label curl
- decrease registration issues

Steel frame + arms designed to last the lifetime of the press

One-piece arms machined without welds and attached to mounting plate with collars containing bolts

Plasma coated roller approved for direct food contact materials

Lock-out mechanism to hold arm safely out of the way during roll changes

Various mounting plate options allow compatibility with any flexo/digital label finishing press

Made in U.S.A + manufactured under U.S. Patent #5,938,146

Roller widths	Arm lengths	
12.5"	9.5" arms for 5,000' to 10,000' rolls of self wound lamination	11.5" arms for 20,000' rolls of self wound lamination
14"		
16.5"		
18"
