

SOHN LABEL PRINTING EQUIPMENT

MODEL 4400 FOUR COLOR LABEL PRINTER

* options may not be shown

SOHN MODEL 4400 4-Color LABEL PRINTER

Sohn's versatile 4400 Series Label Printer is the first label printing machine designed for in-plant use that is simple to operate and produces high quality printed die-cut labels with capabilities of 1-4 colors.

Our model 4400 Label Printer brings the capabilities of a commercial printer inside your own facility. Our unit will eliminate costly inventory, long lead times, expensive set up charges and high quantity minimum order requirements. The Model 4400 will produce premium single or multi-colored labels when you need them. Printing the exact number of labels you need saves time and reduces waste. Labels can be printed on pressure-sensitive, gummed or ungummed stock. They can be made from high gloss, litho, colored, fluorescent, tag, foil, acetate material and many other materials. Designed for high speed operation, the unit prints, die-cuts any shape and rewinds the waste matrix and finished labels in one roll to roll operation. This machine has sheeting capabilities and a complete pressurized shut off on the heating system.

The Model 4400 has 4 flexographic print stations, each with running lateral and longitudinal registration control. Print stations are designed to use state of the art photo-polymer printing plates. An optional "quick change" plate mounting system is available which will reduce set up times on repeat runs. Die cutting configuration options includes 3 die cutting stations or laminating capabilities with running longitudinal registration control.

Sohn's 4400 Series label makers are engineered for a long service life of continuous usage with minimum main-tenance. Standard electrical components include a proven, fuse protected, solid state variable speed DC motor drive and automatic shut off counter.

SUPPLIES

SPECIFICATIONS

- CE Compliant
- Dimensions (LxWxH): 58" x 26" x 72" (1473mm x 660mm x 1829mm)
- Weight: 645 lbs. (293kg)
- Electrical Requirements: 120 VAC, 60 HZ, 1ø, or 200-250 VAC, 50 HZ, 1ø
- Variable Speed - Maximum Speed: 100 Feet per Minute (30.5 Meters per Minute)
- Colors: Prints 4 Spot Colors
- Dryers: 4 Recirculating Forced Air Dryers
- Core: 3" (76mm) Standard Unwind and Rewind - other sizes available
- Maximum Web Width When Die Cutting Only: 5" (127mm)
- Maximum Print Width: 4.125" (108mm)
- Minimum Repeat: 4.00" (102mm)
- Maximum Repeat: 9.25" (235mm)
- Maximum Roll Stock Diameter: 15" (381mm)
- Die Stations: Three - Accepts both solid, and flexible dies with magnetic cylinders
- Lamination: Uses Self Wound and Lined Films - Maximum Diameter: 15" (381mm)
- Pitch: .125 Circumferential Pitch
